MEMORY

and the

SHOAH

A Holocaust Symposium

Memory plays a key role in our lives as humans, for it is an integral connection to our past lives. At times triggered, memory disturbs and disorients the Holocaust survivor, while memoirs of those who have lived through this tragedy reconstruct their lives for future generations to understand. Three speakers will provide various perspectives on the relationship of memory to the apocalyptic period of the Holocaust.

PROF. LORENZ REIBLING
Moderator

PROF. SUSAN MICHALCZYK
Boston College/ A&S Honors Program
"Memory, Trauma, and the Holocaust"
